

Model: PJR

Exercise Machine - Charger - Monitor for Storing Lead-Acid Batteries

U.S. PATENT 5635815

- Gives Notice of Impending Battery Failure with "Bullet-Proof" Reliability
- Exercises and Conditions Batteries by Imitating Engine Start-up
- Rugged Steel Case - Alligator Clips on Heavy-Duty Wire for Safe and Easy Installation
- Easy to Read Display - Can be Read from a Distance
- Exercise and Pre-Fail Notification Greatly Extends Battery Life - Saves Replacement Costs and **Reduces need to Recycle**
- Complete with Trickle Charger
- Manual Test Feature Provides Convenient Assessment of Battery's Condition

**Don't just charge it -
EXER GIZE it!**

Specifications:

MODEL PJR-12-60

Battery System – 12 Volt DC Lead Acid and Gel-Cell batteries
 Application – Car or Boat Battery
 Connection – Battery Clips
 Test Current – 65A nominal
 Test Duration – 18 Seconds manual or auto
 Alarm Set Point – 9.8 volts
 Lockout Time (after test) – 10 minutes
 Auto Exercise Cycle – Once every 12 hours
 Ambient Temperature Range - -30°F to 110°F
 Dimensions – 4.25" H x 8" W x 5.5" D
 Weight – 6 lbs

MODEL PJR-12-10

Battery System – 12 Volt DC Lead Acid and Gel-Cell batteries – 12 to 20 Amp-Hour Battery Size
 Application – Jet-ski or Motorcycle

MODEL PJR-12-20

Battery System – 12 Volt DC Lead Acid and Gel-Cell – 21 to 30 A-H or 300 CCA Battery Size
 Application – Jet-ski or Garden Tractor

MODEL PJR-12-30

Battery System – 12 Volt DC Lead Acid and Gel-Cell – 301 to 400 CCA Battery Size
 Application – Garden Tractor

Many other models available - Contact us about your application!

The **EXER GIZER** exercises, conditions, monitors and prolongs the life of lead acid batteries by keeping lead plates active. The daily, starting-duty test consists of a load test equal to the starting load (in watt-seconds) of an average size standby engine. During the test, an alarm activates when battery voltage falls below alarm set point. A manual test may be initiated at any time by pressing the manual test button.
